

Agreement on medical research and education between Chiba Cancer Center and Hebei Medical University 4th Hospital, China

Chiba Cancer Center and Hebei Medical University 4th Hospital, Shijarzuhan, Chiba have agreed to promote medical researches and the education in oncology by enhancing the partnership between the hospitals. We thereby exchanged the agreement document at Chiba Cancer Center on May 26, 2010 as follows.

President Wang, Hebei Medical University 4th Hospital (left) and President Nakagawa, Chiba Cancer Center (right) with agreement files

Chiba Cancer Center, also as Department of Molecular Biology and Oncology, Graduate School of Medicine, Chiba University, have been accepted a number of students and medical staffs from the 4th Hospital and our medical staffs have been working with them in various fields of cancer research.

Hebei Medical University 4th Hospital, as a major cancer center in Hebei Province, China, has a number of advanced medical technologies and clinical experiences in oncology in particular esophageal cancer since a southern area of Hebei Province has many cases of esophageal cancer as a WHO health survey demonstrated.

Drs. Nakagawa, President, Chiba Cancer Center and Tagawa, the Division Head, have paid several visits to the 4th Hospital and initiated a couple of collaborative researches thereafter.

Both hospitals are going to extend ongoing collaboration in medical oncology and to facilitate staffs exchange programs according to the agreement in future.
